

## 10 methods for portable storage to support your move

1. Get packed at your pace. Youve probably had plenty of rushed moving days in your life, running around like crazy to get things ready for the movers. Not an easy time. Portable storage lets you get things ready when youre ready. Would you rather take all the time you need to pack-- even weeks? Portable storage makes it easy to do just that.
2. Back-safe loading. Unless youre paying for expensive movers, carrying boxes and furniture into a moving van is hard on your body. Dont risk injuring your back! A portable storage unit is at ground-level, helping you avoid lots of lifting and climbing.
3. Keep an eye on your possessions. When you hire movers, theres always a bit of nagging doubt that something might go missing. Its hard to be trusting with people you dont know. When you use a portable storage unit, you dont have to trust your things to a stranger. Your portable storage unit is locked and safe-- accessible only by you.
4. Save money. Hiring movers costs a fortune... and even renting a moving truck is expensive. But since portable storage doesnt require the equipment or manpower, its cheaper than other methods.
5. Pack smart. Moving is a chaotic time. And seeing your possessions boxed up and cluttering your house makes it worse. Portable storage units let you pack smart. You can pack up in a logical order, getting unnecessary items out of your home first.
6. Avoid getting behind the wheel of a monster. Unless you have lots of experience with huge vehicles, driving a big moving truck isnt easy. If you use a portable storage container, however, you simply make a call and the container is relocated for you.
7. Leisurely unpacking. When you use movers or a moving truck, all boxes and furniture --even the stuff youre not ready to use-- goes into the house at the same time. When you use portable storage, however, you unpack items only as you need them.
8. Easy temporary storage. Moving sometimes requires a little extra planning-- and a bit of a transition. If youre going to be staying in a temporary home during the transition, your portable storage unit can be stored in a warehouse until youre ready for your things.
9. Focus on the family. Especially for families with children, moving day is a difficult time. With a portable storage unit, you dont have to worry about your things on moving day. You simply make a call, and theyre transferred to your new home for you. Then you can focus on getting your family moved comfortably.
10. Reduce stress. Moving is one of the most stressful things you can do. Its hard not having a home! Portable storage cuts down on [moving](#) stress, as not having to keep track of your packed items, a truck, and movers makes the whole day go more smoothly.
