

Handmade or Personalized Baby Pillow Keepsakes

A handmade or personalized baby pillow can add that extra touch to nursery decor. It is also a thoughtful item for a breastfeeding mom, who can use it to prop up a newborn while nursing. Whether you are looking for a unique shower gift or a special decoration for the bedroom of your own child, a custom baby pillow is a great choice. Personalization makes it a sentimental keepsake that will be treasured for years to come.

You can either make a custom baby pillow by hand or design and purchase one online. This is a simple project to make if you already have some basic craft abilities. Depending on your talents, you can crochet, sew, embroider, or use another method for this special gift. Purchasing a small pillowcase and transferring words or images onto it from your computer is probably the easiest way to decorate a [baby pillow](#) yourself. There are also many online stores where you can purchase a personalized baby pillow if you do not have the time or skills for a handmade one.

It might be a good idea to discover what colors or theme the bedroom will be decorated in prior to designing a baby pillow. By doing this, you will know that your gift will coordinate with the nursery. Picking neutral colors, on the other hand, means that the baby pillow will go with many different decorating themes.

What type of design do you want to create on the personalized baby pillow? You can get as creative as you want. One traditional option for a baby pillow is to include the full name of an infant and details about his or her birth, such as height, weight, and birthday. You could also use a favorite quotation, short poem, or scripture. A simple, yet classy, option is to put just the initials on a baby pillow in script. Pictures of family members who live far away can be printed on the fabric. You could also have the big brother or sister create a special piece of artwork for the baby pillow.

An infant who is less than eighteen months of age should never use a baby pillow unless an adult is closely watching, due to safety concerns.

According to experts, soft objects like this are suffocation hazards when they are in cribs or next to sleeping infants. The actual nighttime use of a baby pillow should be limited to toddlers to avoid the serious risk of SIDS.
