

Quonset Hut Style Steel Buildings

The World War II military quonset hut was the forerunner to modern day steel buildings. Quonset huts were used to house soldiers in the field during the war. Quonset huts were easy to put up and take down. The basic design of the Quonset hut quickly became popular with civilians. The basic building design of the Quonset hut is used today for many purposes. Quonset huts have an arch design where the curved walls meet the floor. Because of the arch design, it was difficult to place furniture or machinery along the walls of the Quonset hut. To solve this problem, the walls were altered to have a 90 degree angle.

[Steel buildings](#) today are a take off on the military Quonset hut. The Quonset hut is the idea behind many of the steel buildings today. The modern day Quonset hut can be put together in no time. Right after World War II, airplane hangers were made out of steel and designed after the Quonset hut. Thousands of the Quonset huts began to be made. The popularity of the huts grew because of how easy they were to put together. The military still uses the Quonset hut style steel buildings. Quonset huts can be used for office buildings as well as for storage. The uses for Quonset huts really are endless.

The durability of the Quonset hut can not be beat, even though its looks are not very attractive. Civilians use Quonset huts for storage and office space also. Even American farmers will sometimes use Quonset huts to store their farm equipment in, livestock feed and other things in. If you have room on your property, you can use small Quonset huts to keep vehicles and motorcycles in too. The Quonset hut is so popular, that there are even portable plastic style ones available now too. Quonset huts are used for green houses, canopies for recreations vehicles, boat shelters, animal shelters, the list goes on and on. Quonset hut canopies are now used for boat shelter, animal shelters, green houses, etc. Metal frames and a plastic cover are used to make popular Quonset style green houses today. What makes the Quonset green house so popular is the easy and inexpensive way it can be heated. It is worth looking into the new style Quonset hut buildings.
