

## Exchange ActiveSync Brings Many Benefits To Businesses

Sending and receiving information between computers and mobile devices is one of the most important functions of modern technology. For companies to successfully function, they need to make sure that their computers are able to communicate with their mobile devices while their employees are out with them in the field. This allows everyone at the company to stay on top of what is happening and what needs to happen in order for the organization to succeed. Exchange ActiveSync is an e-mail protocol that was created by Microsoft to make it easier for mobile devices to interface with computers.

Exchange ActiveSync is optimized for use on networks with high latency and low bandwidth. This means that you do not need a very sophisticated system of computers and servers to use Exchange ActiveSync. When a machine is set to allow client access in Microsoft Exchange, [Exchange activesync](#) is automatically turned on. There are many great ways that this protocol can help the people that use it.

Using Exchange ActiveSync means that your employees will always be able to stay in the know about what is going on at the company. With Exchange ActiveSync, users of company mobile devices will be able to do things like send high-priority e-mails and flag them for follow-up, synchronize SMS messages with Exchange mailboxes, and synchronize entire groups of conversations. There are also features in Exchange ActiveSync that allow administrators to set certain security policies. These policies protect anyone that uses Exchange ActiveSync from falling victim to exploitation that could compromise sensitive business data.

If you want to get started using ActiveSync for your company, it is very easy to do so. All you need to do is install Microsoft Exchange and get it set up the way you want it to work. After you make all the changes that are necessary for your company to effectively use ActiveSync, you can begin reaping the great benefits that this protocol provides. It is extremely important for commercial organizations in today's economy to be doing everything they can to take advantage of technology. ActiveSync provides a great way for all kinds of companies to more easily communicate with customers, vendors, and co-workers. Set up ActiveSync on your business computers as soon as possible so that you can enjoy more streamlined communication and a much more accessible centralized server that anyone at your company will be able to access when they need to.
